

### **ABOUT OUE SKYSPACE LA**

- OUE Skyspace LA was developed by OUE, a diversified real estate owner, developer and operator, based out of Singapore.
- Honoring the integrity of the original design of the iconic U.S. Bank Tower and celebrating the culture, community and people of Los Angeles, OUE unveiled Skyspace LA in June 2015.
- The all-new OUE Skyspace LA is a multi-faceted attraction featuring an interactive floor, thrilling Skyslide and California's tallest open-air observation decks.
- Located on the 54<sup>th</sup> floor, OUE Skyspace LA's interactive experience features a 360-degree video wall which showcases scenic landscapes from the San Gabriel Mountains to the Pacific Ocean, an Infinity Mirror which simulates a stunning view from high above the 54<sup>th</sup> floor, and a Silhouette wall which uses pixels to reflect images based on your individual body movements.
- Located on the 69<sup>th</sup> floor, the two open-air observation decks offer a complete view of Los Angeles and its unique topography. From nearly 1,000 feet above downtown LA, visitors are offered a complete view of the city, from the mountains to the ocean, which can be enjoyed year-round.
- The Skyslide is an outdoor glass slide positioned nearly 1,000 feet above downtown Los Angeles. Made entirely of clear glass, 1 ¼ inches thick, the OUE Skyslide extends forty-five feet long, from the 70th floor to the 69th floor of the U.S. Bank Tower. The entrance to the Skyslide is approximately four feet wide.
